

# Solar 12v electric storage heater

What is a solar greenhouse heater?

A solar greenhouse heater is a heating system designed to harness solar energy to regulate temperature and provide warmth within a greenhouse, explains Joel Worthington, president of Mr. Electric, a Neighborly company offering comprehensive residential and commercial electrical services.

Can solar panels charge storage heaters?

If you have solar panels, it's worth using the electricity your panels generate to charge up storage heaters during the day and release the heat in the evening. In fact, using solar panels to charge storage heaters is an excellent way to kick carbon and cut your running costs.

Can a solar greenhouse heater be used as a space heater?

A few standalone products that could realistically be called solar greenhouse heaters are available, but most combine solar panels with electric space heaters. Standalone products work best in small spaces. For larger spaces, you'll need a full-on solar array powering a heat pump or resistive heater.

What is an electric thermal storage heater?

An electric thermal storage heater is a stand-alone, off-peak heating system that eliminates the need for a backup fossil fuel heating system that is wall-mounted and looks a bit like a radiator that contains a 'bank' of specially designed, high-density ceramic bricks. These bricks can store vast amounts of heat for extended periods of time.

Can a solar air heater heat a house?

Solar air heaters can heat a house. However, your best use of solar-heated air is to reduce the heating and cost of your conventional heating system. You will want to have a traditional heating system for backup cloudy, rainy, or snowy days or nights. On many sunny days, your backup system may not need to run at all.

What is solar-powered residential heating?

Spanish heating specialist Elnur Gabarron has developed a new solar-powered residential heating concept based on the use of storage heaters. "Our storage heaters are specially designed to work on grid-connected PV installations, using surplus power to produce sustainable heating," a company spokesperson told pv magazine.
