

Solar Photovoltaic Power Generation Income Tax

Are solar photovoltaic systems eligible for a tax credit?

Solar photovoltaic (PV) systems installed in 2020 and 2021 are eligible for a 26% tax credit. In August 2022, Congress passed an extension of the investment tax credit (ITC,) raising it to 30% for installations between 2022-2032. (Systems installed on or before December 31,2019, were also eligible for a 30% tax credit.)

Can I get a tax credit for solar energy?

There are two tax credits available for businesses and other entities like nonprofits and local and tribal governments that purchase solar energy systems (see the Homeowner's Guide to the Federal Tax Credit for Solar Photovoltaics for information for individuals):

Do solar rebates increase taxable income?

The credit amount varies by state and, if refundable, might raise your taxable income. Rebates provided to you by your utility company in exchange for installing a solar PV system will reduce your solar system costs, lowering the amount you can claim under the federal solar tax credit.

Are solar panels tax deductible?

Under most circumstances, subsidies provided by your utility to you to install a solar PV system are excluded from income taxes through an exemption in federal law. When this is the case, the utility rebate for installing solar is subtracted from your system costs before you calculate your tax credit.

Can I claim a tax credit for an off-site solar project?

Notes: the IRS issued a statement (see link above) allowing a particular taxpayer to claim a tax creditfor purchasing an interest in an off-site community solar project. However, this document, known as a private letter ruling or PLR, may not be relied on as precedent by other taxpayers.
