

Solar Photovoltaic Wire Mesh Panel

What is a solar mesh guard kit?

The Solar Mesh Guard Kit is designed to keep pest birds and rodents from getting under solar panels and damaging the roof and electrical wiring. This system securely protects panels by creating a physical barrier that excludes pests from solar panel mounting areas.

Can you put wire mesh on a solar panel?

Manufactured by Heyco Products, these kits of PVC-coated wire mesh and accompanying stainless steel clips can be installed on almost all solar panel systems to provide protection against unwanted birds, pigeons, and furry creatures.

What is bird-X solar mesh guard kit?

Bird-X Solar Mesh Guard Kit is designed to prevent birds and rodents from accessing the area beneath your PV panels and causing damage to your roof and the panels' electrical wiring. It creates a barrier that keeps pests away from the mounting area of the panels. You can attach it to panels without causing harm or voiding their warranty.

Should I bird proof my solar panels?

By Bird Proofing your Solar Panels, you can protect your Solar Panels and your Green Energy Investment. This can be done by simply installing a wire mesh, or Bird netting to the outside perimeter of your Solar Panels. This prevents pigeons from nesting under your Solar panels, without impacting the panels warranty.

What is a solar panel Bird Kit?

The solar panel bird kit is virtually invisible once installed. This wire mesh can easily be removed for service or repair to the solar panels. Don't scratch or affect the integrity of your solar panels. Would you like to tell us about a lower price?

What is Bird B Gone solar panel bird deterrent mesh?

Bird B Gone Solar Panel Bird Deterrent Mesh comes in a 100 ft roll with two width options--6 and 8 inches. You can choose the right size by measuring the space between your roof and the panel. This mesh binds the cage of the array without penetrating or drilling the modules. It also has easy installation and takes only a few hours.
