

# Solar panel leasing model

What is solar leasing?

Solar leasing is a financing option through which customers pay a monthly fee for the panels and get to use the power the system produces. They do not, however, own the panels.

How do solar leases and PPAs work?

Solar leases and PPAs work similarly. With these financing options, instead of buying a solar panel system, you can lease it for 20-25 years and still receive the energy produced by the panels. During this time, you pay the solar leasing company for the benefits of the solar panel system (i.e., the solar electricity powering your home).

Is solar leasing a good idea?

There are many benefits to going solar, but solar leasing also offers its own unique set of benefits. First, it reduces a customer's upfront costs to install panels, often to \$0. Using a solar lease means the maintenance and liability to damaged panels rests on the solar company rather than the homeowner.

Should you buy or lease solar panels?

Homeowners who are considering solar panels have multiple buying options, including a cash purchase, solar loan or leasing solar panels. While a single cash purchase can be viable if you have the funds available, there are also ways to go solar at zero upfront cost -- like with a solar lease.

Can a homebuyer transfer a solar panel lease?

Transfer the lease: If you're moving but don't want to move your panels or purchase the system outright, you can try to transfer the lease to whomever buys your home. However, the homebuyer would have to assume the terms of the lease.

Does a solar lease fit a home?

From a financial standpoint, a solar lease may fit homeowners who meet the following conditions: A solar lease also delegates system maintenance to the provider, although solar panels typically do not require much maintenance beyond regular cleaning.
