

Solar pitched roof mounting bracket

Can solar panels be mounted on a pitched roof?

Yes, solar panels can be mounted on a pitched roof using on-roof mounts. The most common mounting method for solar PV systems on pitched roofs is on-roof mounting on saddle roofs. This mounting method is less expensive than in-roof mounting.

What is a solar panel roof mount?

A solar panel roof mount (also called a solar racking mount or solar system mount) will hold your solar panels and system in place. The mounting system is a crucial component because it is responsible for securing and stabilizing the solar panels on your roof without compromising the roof's stability or water tightness.

What is a solar panel mounting bracket?

Refer to section "Installation handover" This solar panel mounting bracket is a robust and versatile galvanised mild steel bracketsuitable for mounting a variety of solar panels between 20W and 150W in size,against a wall or on a post.
