

What are portable solar panels & solar battery chargers?

Portable solar panels and solar battery chargers are easy-to-use devices that provide backup power to anyone who happens to be away from a working power outlet, including hikers, car campers, and even people looking to keep their devices running during a power outage at home.

How many solar chargers are there?

I called in 13 different solar chargers from nine different manufacturers for testing. The main criteria was that it be a portable panel that you can use to charge a small electronic device, like a smartphone or a tablet, without the need for a power bank as an intermediary.

What is a solar power charger?

There's a lot to understand about solar power chargers, but at their heart, a small solar panel consists of several photovoltaic cells grouped together to absorb some of the sun's energy and convert it into an electric charge that you can use to charge electronics.

Are solar chargers good for small electronics?

Learn More > Solar chargers can translate the sun's energy directly into power for small electronics. Whereas larger solar panels require a power station to play intermediary (lest you burn up your electronics), these smaller panels have just the right amount of kick for the likes of a smartphone or satellite messenger.

Can You charge a solar panel directly?

Angling your solar panel to face the sun directly can substantially increase its power output. What Can You Charge with a Portable Solar Device? What Can Portable Solar Devices Charge? The answer all comes down to wattage. Portable solar devices range widely in the amount of power they can produce, which is largely a function of panel size.
