

State Grid invests in microgrids

Should Connecticut invest in microgrids?

The Connecticut legislature, in particular, has worked to wrap microgrids into state policies designed to support a variety of energy investments for both public and private entities. First, the state added microgrids to the list of qualifying projects that municipal energy improvement districts can pursue.

Are microgrids a state program?

Several states have enacted legislation to include microgrids under existing state programs and incentives. The Connecticut legislature, in particular, has worked to wrap microgrids into state policies designed to support a variety of energy investments for both public and private entities.

Does Connecticut have a microgrid grant program?

On a larger scale, Connecticut has funded a Microgrid Grant and Loan Program administered by the state energy office for nearly a decade. The legislature initially funded the grant program in response to Superstorm Sandy, ultimately rewarding at least 15 projects with more than \$36 million.

Are microgrids the future of energy resilience?

Microgrids are poised to play a large role in the future of energy resilience in the U.S. electric system. However, these systems face financial and regulatory barriers in many states. Several states have already taken steps to enable new financing tools and improve regulatory processes.

Which states have included microgrids in grid modernization initiatives?

Colorado, Minnesota and New Mexico have included microgrids under broad grid modernization initiatives. In Colorado and Minnesota, the legislatures require regulated utilities to develop and submit transmission and distribution system plans to the state PUCs.

Can a bank finance a microgrid project?

A number of states have permitted state green banks, infrastructure banks or resilience banks to support microgrid projects, offering potential developers an additional avenue to finance a qualifying project.
