

What is Weibo & how does it work?

Weibo is a microblogging application, launched by Sina Corporation in 2009, based on user relationships to share, disseminate and get information. As of Q4 2019, it has over 516 million monthly active users (compared to Twitter's 300 million), making it only the second largest social media platform in China after WeChat.

How powerful is Weibo compared to other social media platforms?

The above cases make clear that compared to other social media platforms, Weibo has a powerful ability, due to its large sample size, to study and track sentiment, affective states, online behaviours, and communications within the Chinese socio-cultural context.

When was the State Grid Corporation of China founded?

The State Grid Corporation of China was founded on December 29, 2002, when the restructuring divided the former State Power Corporation of China into two grid companies, five generation groups and four accessorial business companies.

Is Sina Weibo accessible to unregistered users?

Neither unverified account pages nor comments to posts by verified accounts are accessible to unregistered users. Although often described as a Chinese version of Twitter, Sina Weibo combines elements of Twitter, Facebook, and Medium, along with other social media platforms.

Why did Weibo suspend its 'Trending Topics' page?

On 11 June 2020, the Cybersecurity Administration of China ordered Weibo to suspend its 'trending topics' page for a week. The CAC accused Weibo of 'dissemination of illegal information'.

Will Weibo be archived for non-commercial use?

A sign of the social media platforms importance, in April 2019, the National Library of China announced that it will archive all public posts on Weibo for non-commercial uses.
