

# The photovoltaic panels were sent to the manufacturer but they were delayed

Will a retroactive tax on solar panels hurt the solar industry?

Retroactive taxes on solar panels from China are likely to dramatically increase costs for U.S. solar installers. If the government decides to impose these taxes on the country's primary sources of solar panels, the resulting stress on the supply chain could put a damper on the solar industry's expansion.

Are US solar panels finally picking up after gridlock?

REUTERS/Brian Snyder/File Photo Purchase Licensing Rights March 6 (Reuters) - U.S. imports of solar panels are finally picking up after months of gridlock stemming from implementation of a new law banning goods made with forced labor, according to two Chinese solar companies.

Are 83% of solar companies notified of canceled or delayed panels?

According to industry surveys, 83% of U.S. solar companies have reported being notified of canceled or delayed panel supply as a result of the Commerce Department's decision to initiate an investigation.

Are solar panels affected by a tariff dispute?

However, another big solar company, First Solar, which manufactures a type of solar panel unaffected by the tariff dispute, said it was supportive of the investigation. "What we are interested in is ensuring that there is a level playing field for domestic manufacturers," said Reuven Proenca, a spokesman for First Solar.

Are US solar companies still struggling to survive?

But U.S. solar companies say they are still struggling to survive as competitors in China and Southeast Asia flood the global market with solar panels that are being sold at prices far below what American firms need to charge to stay in business.

Did China circumvent rules to prevent subsidized solar panels from flooding US market?

The Commerce Department initiated its investigation on March 25 after Auxin Solar, a small solar panel manufacturer based in California, filed a petition requesting an inquiry into whether China was circumventing rules intended to prevent state-subsidized solar parts from flooding the U.S. market.

A flood of Chinese-produced solar panels is driving prices to record lows in the US, a boon for renewable energy developers but a threat to solar manufacturers trying to create a domestic...
