

Top 10 greenhouse photovoltaic panel companies

Who is the best rooftop solar expert in America?

Learn more about the SolarReviews Expert Rating system. Andy is arguably the most qualified rooftop solar expert in America. He is in a unique position, having founded a large solar company but now being independent of any particular company.

Should you choose a TPO or a rooftop solar system?

If you go with a TPO option, ask the solar company how it passes on tax credit and incentive savings to the customer. The value of a rooftop solar system depends, of course, on what you value. If your primary goal is lowering your carbon emissions, do a little research on how clean your grid electricity already is.

How much does a rooftop solar system cost?

It's very likely your residential rooftop solar array will cost at least \$10,000, and this can often soar above \$20,000. In fact, EnergySage estimates that an 11-kW system will cost about \$22,000, on average, after factoring in the federal tax credit. The table below lists pricing for companies in our rating.

Is Blue Raven a good solar company?

Blue Raven has an A+ rating from BBB and 4.4 out of 5 stars from over 1,300 customers, which is one of the highest solar customer ratings we've seen. Customers praise the company's communication and smooth, transparent process. Some report pushy salespeople and low-performing panels, however.

Solar energy is increasingly common on rooftops everywhere. Today, more than 2 million solar installations in the U.S. are generating electricity from the sun rather than from the local utility company. If you're thinking of greening your ...
