

Trump comments on solar power

The best advice on installing solar panels is to install early. Solar prices are expected to increase in the near future, and energy price inflation will mean higher energy bills for you and your family. Instead of paying higher ...

On November 5, America elected Donald Trump as the 47th President of the United States. Perhaps more importantly for shaping policy, the GOP now controls the Senate and, as of writing this article, appears to also ...

We are keeping an ongoing list of former President Donald Trump's most frequent and glaringly inaccurate claims about solar and wind energy sources and projects since he vacated the White House in January ...
