

Villa energy storage lithium battery

What is a villagrid energy storage system?

The VillaGrid energy storage system is complementary to home solar panels which charge the battery. As homeowners face rising electricity rates, unplanned power outages and Public Safety Power Shutoffs, the VillaGrid can help them reduce their electric bills and better endure blackouts.

What is a villagrid lithium ion battery?

The VillaGrid is the industry's first available lithium titanate (LTO) home battery. Most lithium-ion batteries use graphite as their anode (check out this article to learn how batteries work), which is made of carbon and is flammable (though still very safe).

How do I Configure my villagrid energy storage system?

Your VillaGrid energy storage system is configured through the inverter, where it can be set to maximize backup capacity, maximize energy savings (e.g., peak shaving), and many other options. Your VillaGrid energy storage system comes with a quick-start guide as well as a more in-depth manual to explain the available options.

Is villagrid a good battery?

VillaGrid Home Battery - Delivered with a 20-year warranty, the VillaGrid is designed to be the safest, longest-lasting, most powerful and efficient battery on the market, with the highest lifetime usable energy and the lowest lifetime cost of ownership. How many kWh does a villagrid have?

The VillaGrid comes in 5.75 kWh or 11.5 kWh sizes. Multiple VillaGrids can be installed to increase storage capacity and power. What type of batteries does the VillaGrid use and why? We chose lithium titanate batteries (made by Toshiba) because they enable us to deliver power, safety, longevity, and reliability.

Are lithium ion batteries flammable?

Most lithium-ion batteries use graphite as their anode (check out this article to learn how batteries work), which is made of carbon and is flammable (though still very safe). However, LTO battery cells don't include any carbon, meaning they aren't flammable and can provide you with extra peace of mind.
