Are solar stocks a risky investment?

In such an environment, solar stocks as a group remain higher risk than other sectors on Wall Street. Still, the long-term promise of solar remains significant in the age of climate change - so many investors are eager to get a foothold in the industry, regardless of the challenges.

Why are solar stocks a bearish investment?

The high-interest rate environment made a bearish case for solar stocks throughout the year due to a demand drop among retail customers. Moreover, California's Net Energy Metering 3.0 policy has reduced incentives for rooftop solar owners drastically.

What makes first solar different from other solar panels?

One thing that sets First Solar apart from other solar panel makers is its focus on manufacturing a proprietary, advanced thin-film module. In less-than-ideal conditions, such as low light and hot weather, its panels perform better than competing silicon modules.
