

What is a solar post cap?

A solar post cap is a decorative element that adds ambience and elegance while also providing light. Here at Deck Expressions, we offer a wide range of solar caps and lights for you to choose from. No matter your personal style and taste, we are sure to have an attractive option for you!

What is a solar panel patio cover by extension?

A solar panel patio cover by extension is a patio cover with solar panels incorporated into its design, either sitting on top of the patio or the roofing material itself. You can use the power from the panels in plugs, batteries, and lights for whatever capacity your patio needs.

What is a solar patio cover?

Solar patio covers are part of an emerging category of solar that uses a structure other than the roof of your home or business as the framework for a solar system installation. These structures are often commonly referred to as "solar pergolas." Most small-scale solar installations go on the roof, but not every roof is ideal for solar.

How do you maintain a solar post Cap Light?

Maintaining solar post cap lights is easy, and the cleaner the solar panels and lens caps are the more light they will produce. Just periodically wipe down the outside of the light using a damp rag. Using harsh cleaning chemicals could damage the solar panels and cause lens caps to become foggy.

Can a slanted patio cover be used for solar panels?

You'll have to coordinate a custom job with a slanted patio cover roof from Alumawood with the solar panel installer to get the solar panel patio cover of your dreams. If you have an existing pergola from them, it should be fine for solar panelsas long as it meets the requirements.

Do you need a solar panel patio cover?

Homeowners with unsuitable roofsoften favor solar panel patio covers. A solar panel patio cover is a brilliant fusion of eco-friendly technology and outdoor comfort.
