

What to do if you are cheated when installing photovoltaic panels on the roof

How do I avoid solar on my roof?

Another option to avoid solar on your roof entirely is to install a ground mount or join a community solar plan and receive solar energy from an offsite location. A rooftop solar panel installation is a great investment that won't lead to roof damage when you work with a professional, experienced installer.

Can a roof support solar panels?

Make sure your roof can support solar panels. A solar installer, roofing expert, or structural engineer can help you determine your roof's solar suitability.

Can solar panels damage a roof?

Fortunately, roof damage from a solar panel installation is extremely rare because installers take precautionary steps while installing panels to prevent leaks and other damage. Like any home improvement project, using the right service provider is essential to a rooftop solar job.

Should you put racking and solar panels on your roof?

Putting racking and solar panels on your roof alters one of the core parts of your home's structural makeup, and parts of the installation process put your roof at risk if done incorrectly. One of the biggest concerns for property owners is the holes needed in their roofs to secure their solar panels.

What happens if solar panels are not installed properly?

Issues such as leaks, broken tiles, and structural damage can occur if the panels are not installed properly. To avoid roof damage, working with experienced installers who understand the intricacies of solar panel installation is essential. They will know how to secure the panels without compromising the integrity of your roof.

Can you put solar panels on an old roof?

If your roof is old, the answer is no—at least not until you replace it. Asphalt shingles that are 10 years old or more should be replaced before adding a solar array on top, says Ana Almerini, a spokesperson for SolarReviews. New solar panels are warranted to last, on average, 25 years, while most roofs are warranted for 30 years or less.

For example, you can only sell surplus energy if you have photovoltaic panels installed, as solar thermal panels do not directly produce electricity. Installation types can vary between off-grid and on-grid systems, ...
