

Leye photovoltaic panel warranty period

Do solar panels have a warranty?

Most manufacturers offer a standard solar warranty on their products, but the coverage provided in these contracts can vary. By understanding the standard features of a solar panel warranty, and the period of coverage, you can better determine the right solar power warranty for your needs.

What are the different types of solar warranty?

There are two main types of solar warranties: performance warranty and product warranty. A performance warranty is a guarantee that the total system output will not drop below a specified degradation percentage. A product warranty guarantees the solar panel's capability to produce energy, and it's also known as a lifespan warranty.

Can a solar panel warranty be voided?

For example, warranties may be voided if the solar panels are not installed according to specified guidelines or if unauthorized modifications are made. Certain solar panel warranties might not cover fire damage or other outside sources.

Can a solar warranty be transferred to a new owner?

You may need to take steps to ensure the transfer of the warranty goes smoothly, so if you're thinking of selling your home, contact your solar warranty provider and let them know about your plans to find out what's needed. If you lease your equipment, the warranty will usually be transferred to the new owner when they take over the lease.

In some cases, solar panel warranties will also cover solar inverters, micro inverters, wiring and even mounting racks and solar batteries in some cases. However, not all manufacturers include these items. The typical ...
