

Solar power awning

Who is power structures awning?

The Power-Structures Awning solution was developed by a designer/solar installer with 35 years of experience in the architecture, construction and solar industries. We have taken the guess-work out of designing an awning, giving you a beautiful solution delivered to your home or office.

Are solar panel awnings a good investment?

Solar panel awnings or canopies can be a great addition to your home. They can easily add a fantastic looking outdoor living space, providing both shade and an aesthetically pleasing structure to your property, increasing your property's value as well.

Are solar awnings wind tolerant?

Built using traditional solar materials, these glass-based solar panels are very shade tolerant and designed to last for years. The awning has an innovative design that allows wind to pass through gaps between the panels when the awning is retracted slightly, which enables impressive stability in windy conditions.

How does an awning work?

The awning has an innovative design that allows wind to pass through gaps between the panels when the awning is retracted slightly, which enables impressive stability in windy conditions. In extreme weather conditions, the awning automatically retracts completely.

Does power-structures LLC offer awning solutions?

At Power-Structures LLC, we are available right from the start, to help you determine whether our awning solution is a good fit for the building type and design constraints posed on your project. *TIG (tungsten, inert gas), uses a non-consumable tungsten electrode to produce the aluminum weld.

Can a roof be used with a traditional awning?

Can be used with other roofing products for a traditional awning as well. Available in 3 angles: 20 degree, 30 degree and 45 degree from horizontal. A comprehensive structural solution to building a sturdy roof structure for an awning - That's what your customer & local building department want to see! Power & Shade.
