Is solar-energy farm in western Colorado a good fit?

(Photo by Hyoung Chang/The Denver Post) A proposed solar-energy farm in western Colorado that will provide local power has won unanimous approval from the county commissioners who initially rejected it, saying it wouldn't be a good fit in the rural agricultural area.

What is the Delta-Montrose solar project?

The Delta-Montrose Electric Association said the solar project in Delta County will help realize its goals of using more renewable energy and take advantage of declining wind and solar costs.

How much does Delta-Montrose's new solar array cost?

Delta-Montrose plans to complete the newly announced array, which does not yet have a final site, in 2030, at a total cost of about \$96 million. The USDA will eventually forgive 40% of the \$72 million loan.
